

Iñaki Respaldiza

Staff Platform Engineer

Seville, Spain

DevOps | Kubernetes platforms | AWS and Google Cloud | Terraform and Infrastructure as Code | GitOps and CI/CD | Reliability, observability and operations | Developer experience

Professional Summary

Staff Platform Engineer with more than ten years of experience designing, building and operating cloud native platforms on Kubernetes across AWS and Google Cloud.

Focused on platform engineering, cloud architecture and infrastructure automation, with a track record of shaping internal developer platforms, simplifying production operations and helping teams ship with more confidence.

Strong background in multi-tenant Kubernetes platforms, Bring Your Own Cloud architectures, cloud networking, identity and access management, observability, disaster recovery and production operations.

Highlights

- Staff Platform Engineer with more than ten years of experience in cloud, infrastructure and platform engineering.
- Platform architect for Kubernetes-based cloud infrastructure across AWS and Google Cloud.
- Technical lead for platform engineering initiatives across engineering, product, customer success and security contexts.
- Speaker, trainer and active member of cloud native, Docker and WordPress technical communities.

Core Competencies

Platform Engineering: Internal developer platforms, Kubernetes platform architecture, platform reliability, infrastructure automation.

Cloud Architecture: AWS, Google Cloud, multi-cloud architecture, cloud networking, identity and access management.

Reliability and Operations: Observability, disaster recovery, monitoring, incident response, production operations.

Technical Leadership: Architecture decision making, cross-functional collaboration, mentoring, engineering enablement, technical training.

Professional Experience

Okteto

Staff Platform Engineer

December 2019 - Present | Remote / Seville, Spain

Lead the architecture and evolution of Okteto's cloud platform supporting both SaaS and Bring Your Own Cloud deployments across AWS and Google Cloud.

Key responsibilities

- Define technical strategy for Platform Engineering and cloud platform evolution.
- Design scalable Kubernetes platform architectures for SaaS and Bring Your Own Cloud deployment models.
- Lead Infrastructure as Code initiatives using Terraform and Terraform Cloud.
- Design cloud identity, access management and secret management solutions.
- Define platform standards across AWS and Google Cloud.
- Drive platform reliability, automation and operational excellence.
- Coordinate technical initiatives across Engineering, Product, Customer Success and Security.
- Own engineering controls supporting SOC 2 compliance.

Paradigma Digital

DevOps Engineer

September 2019 - December 2019 | On Site / Pozuelo de Alarcón, Spain

Designed and automated cloud infrastructure, CI pipelines and deployment workflows while collaborating with engineering teams to improve reliability and operational efficiency.

Key responsibilities

- Designed and automated cloud infrastructure.
- Built or improved CI pipelines and deployment workflows.
- Collaborated with engineering teams to improve reliability and operational efficiency.

BBVA, Senovo IT Contractor

DevOps Engineer

September 2018 - September 2019 | On Site / Tres Cantos, Spain

Worked on cloud infrastructure automation, Kubernetes adoption and CI/CD platforms for enterprise banking environments.

Key responsibilities

- Worked on cloud infrastructure automation.
- Supported Kubernetes adoption.
- Worked on CI/CD platforms for enterprise banking environments.

PixelatedHeart

DevOps Consultant

January 2015 - September 2018 | Remote / Sevilla, Spain

Member of a collective of independent technology professionals providing DevOps, cloud infrastructure and platform engineering consulting services.

Worked directly with customers to design, automate and operate production infrastructure with a focus on reliability, scalability and operational efficiency.

Key responsibilities

- Development in Python, PHP and Bash/shell scripting.
- Automation, deployment and systems administration.
- Docker adoption and container management.

Various Training Consultant

Technical Instructor

October 2005 - Today | Seville, Spain

Delivered professional training on Linux, Cloud Computing, AWS, Docker, Kubernetes, DevOps, CI/CD, security and infrastructure automation for private companies, technical academies and public institutions.

Organizations included Quantika14, Cámara de Comercio de Sevilla and IDIT Formación.

Key responsibilities

- Designed and delivered professional technical training courses.
- Prepared course materials, presentations and hands on labs.
- Tailored training content to customer needs and participant experience.

University of Seville, Department of Genetics

Internal Student

Academic research experience during Biology studies in the Department of Genetics at the University of Seville.

Key responsibilities

Community

I have been active in Docker, WordPress and cloud native communities through speaking, organizing and mentoring. The talks and event history below are the pieces worth keeping current.

Organizing

- [Docker Community Leader](#)
- [WordPress Sevilla](#)
- [WordCamp Europe and WordCamp Sevilla](#)
- [KroqueCon 2021](#)

Training

- Kubernetes Training, BitRocks SL / Bitnami, 05/2018.
- Bitnami Bootcamp, Cloud Computing System Administration, BitRocks SL / Bitnami, 09/2016.
- Biology studies, University of Seville, unfinished degree.

Languages

Spanish: Native.

English: Professional working proficiency.
